DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-20, drawn to technique of setting up a conferencing call ,
classified in class 370, subclass 261.
 - II. Claims 21-41, drawn to examining a color depth, classified in class 345,
subclass 589.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because Invention I does not require examining the color depth for setting up a conference call. The subcombination has separate utility such as graphically processing of the color depth or intensity for a display system.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

2. A telephone call was made to Y.K Chang on 1/6/04 to request an oral election to the above restriction requirement, but did not result in an election being made.
